FIBA IOT MANUAL UPDATE – WARNING WHISTLE

A "warning whistle" should occur:

- Prior to **crew chief (CC)** entering the **jump circle** for the opening toss
- Prior to ball being **placed at the disposal of the thrower-in** at the start of each new quarter or overtime
- Prior to ball being **placed at the disposal of the thrower-in on a frontcourt endline throw-in**
- Prior to ball being **placed at the disposal of the thrower-in to restart the game after a time-out**

FIBA IOT MANUAL UPDATE – 3 POINT SHOT

The correct mechanic on a 3 points shot is:

- **only the primary referee** (trail or center) signals a 3-point attempt
- the other **outside referee** (trail or center) **does not mirror** the attempt
- in dual coverage area both outside referees (trail and centre) **may** signal the attempt
- if the basket is **made, both outside referees** (trail and centre) signal the successful basket
